

1    **ABSTRACT OF THE DISCLOSURE**

2           A method for manufacturing a multicolored three-dimensional candy  
3    has the steps of heating materials, mixing pigment with the heated materials,  
4    injecting the mixed materials into a mold, adding a supplementary material to  
5    the mold, cooling to form a product and releasing the product from the mold.  
6    Since the materials are divided in parts into inject into different areas of the  
7    mold, the multicolored three-dimensional candy manufactured by the method  
8    has different areas with different depths, contours, shapes and colors. The  
9    appearance of the candy can attract customers to buy it.
